Phenomenon

Objective

Provide an accessible and interactive tool for understanding demographic, educational, and economic factors in Portugal.

Focus Areas

Resident Population

Education Level

Unemployment

Data Overview

Data Sources

Portuguese Census data from 2011 and 2021 (INE).

Resident Population, Education Level
and Unemployment

Variables

Data Structure

Organized to the NUT 4
level (municipal level)

CSV Files

Data Sets

Dataset Overview

Context

Overview of Portugal's
Socio-Economic
Landscape

Relevance of the
Census Data

A comparative
Analysis (2011-2021)

Global Perspective
with Local Implications

Target Users and Needs

AUDIENCE

Government Officials and Planners

Researchers and Students

General Public

Ability to analyze population trends, educational progress, and unemployment.

Interactive elements to filter by Area, Region, Town and Year,

NEEDS

Low Fidelity Prototype

MAP VISUALIZATION

PURPOSE

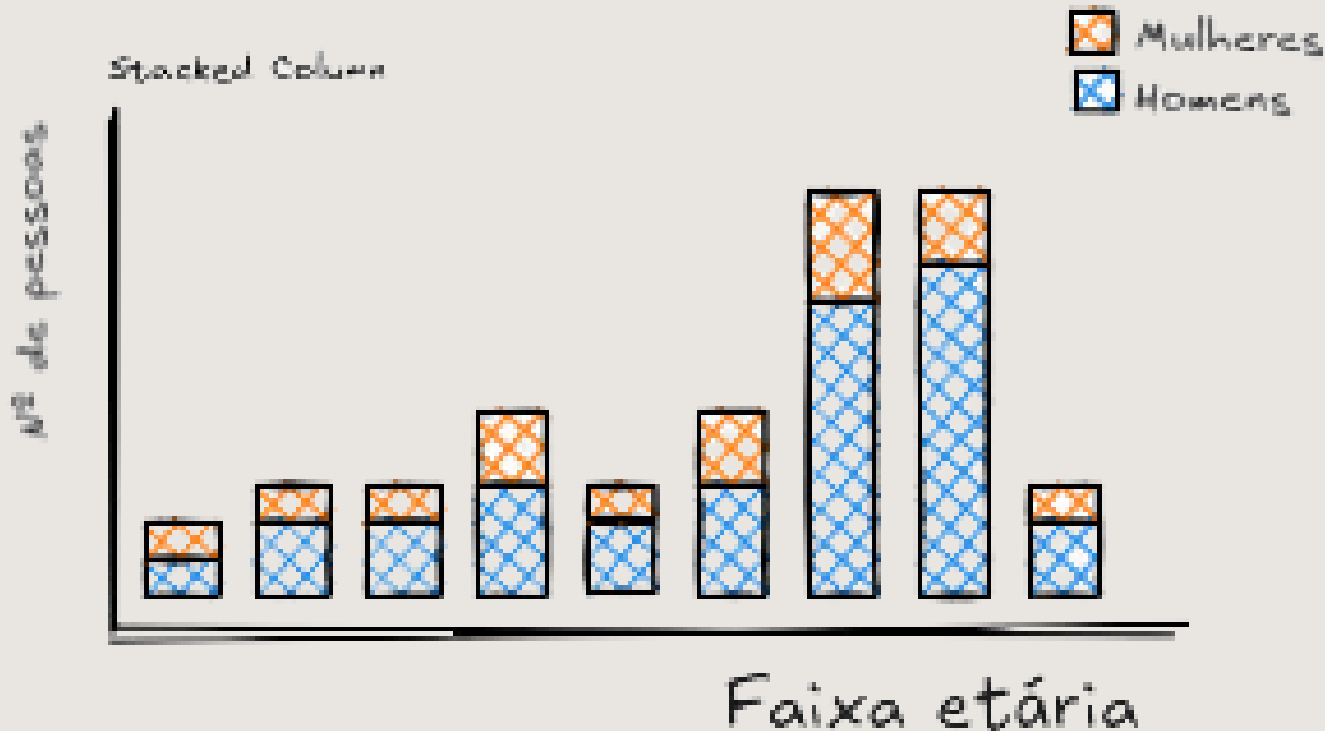

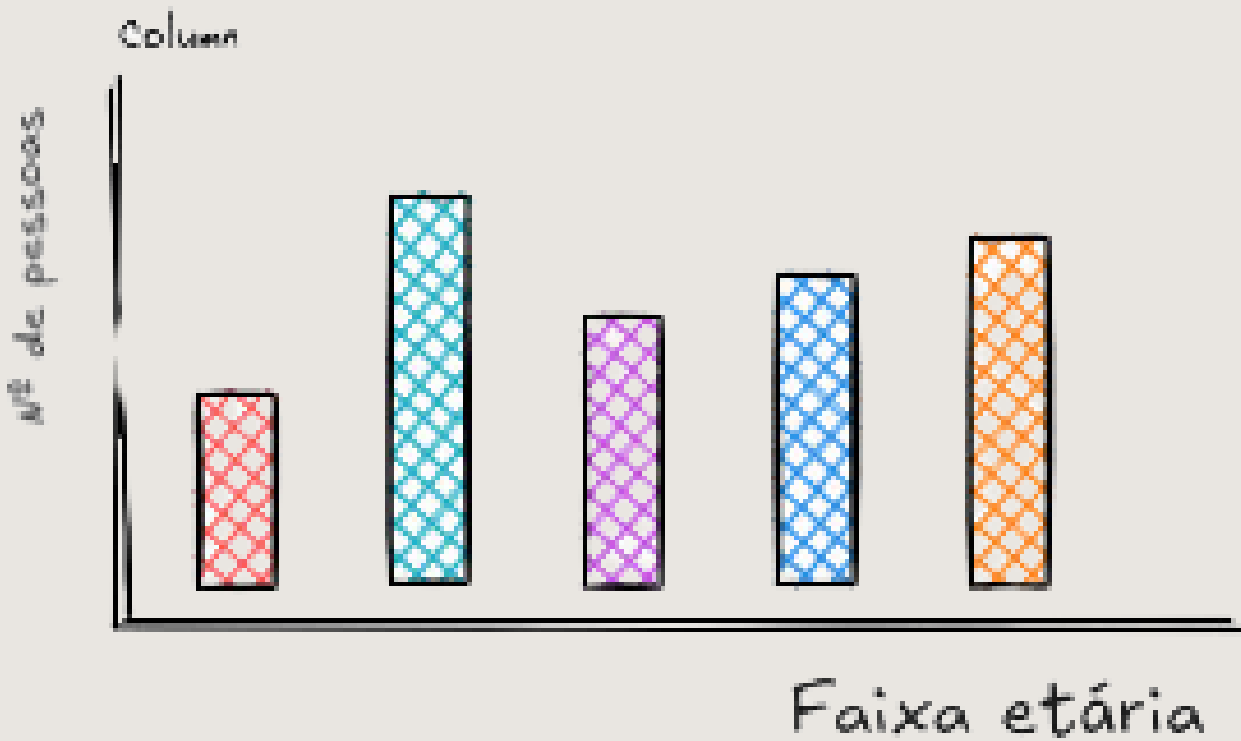

Interactive map allows selection of regions or towns to explore detailed demographic, education, and unemployment data.

Population Distribution by Age and Gender

Donut (Men vs Woman)

Population Distribution by Age and Gender

Donut (Men vs Woman)

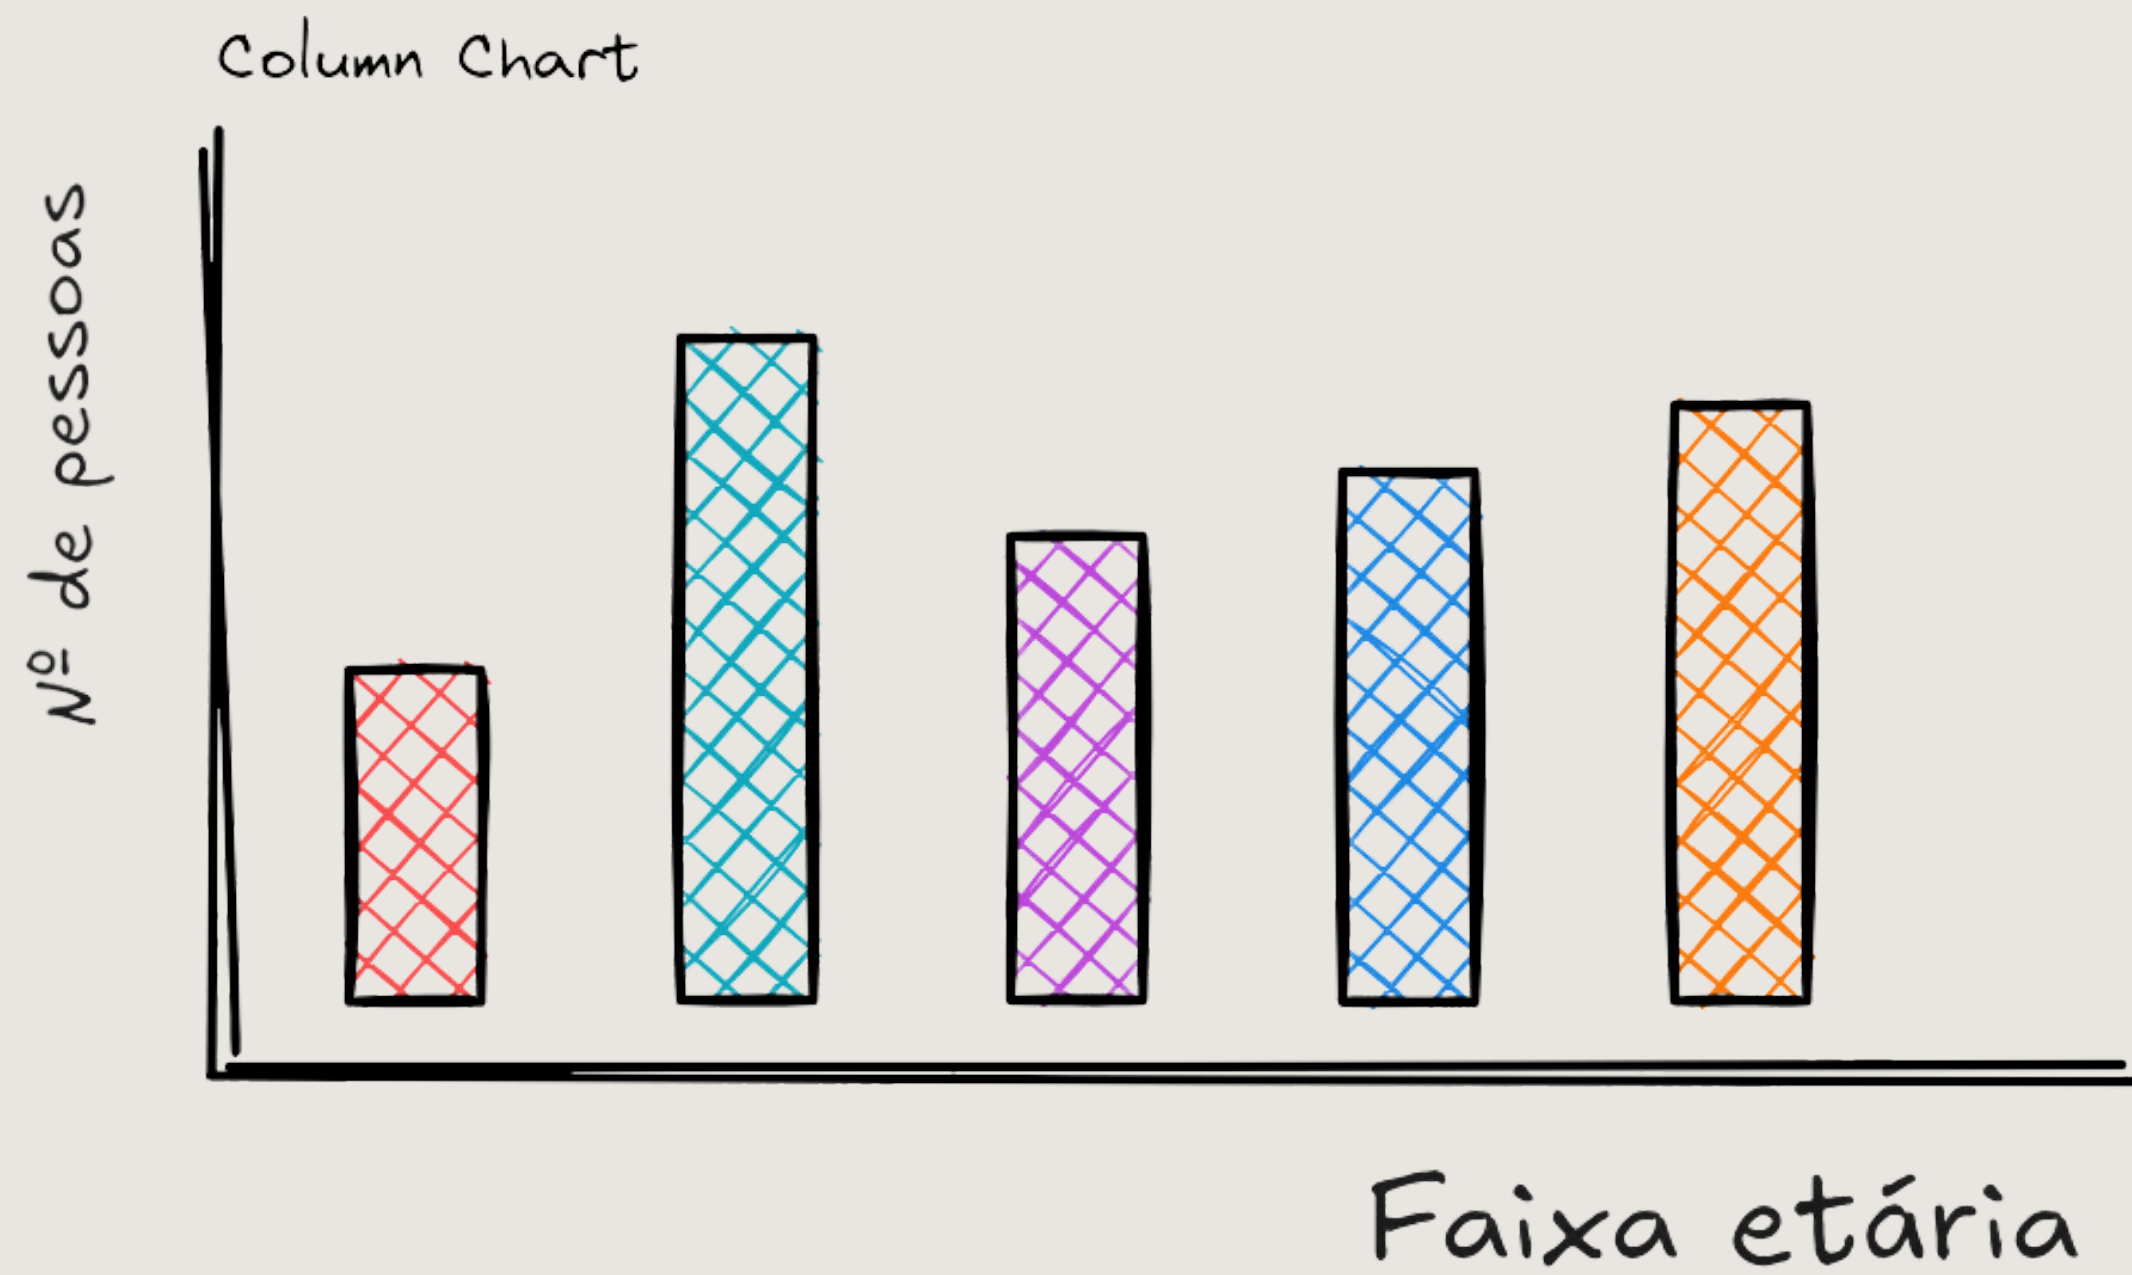

PURPOSE

Shows the overall gender distribution across all age groups.

Population Distribution by Age and Gender

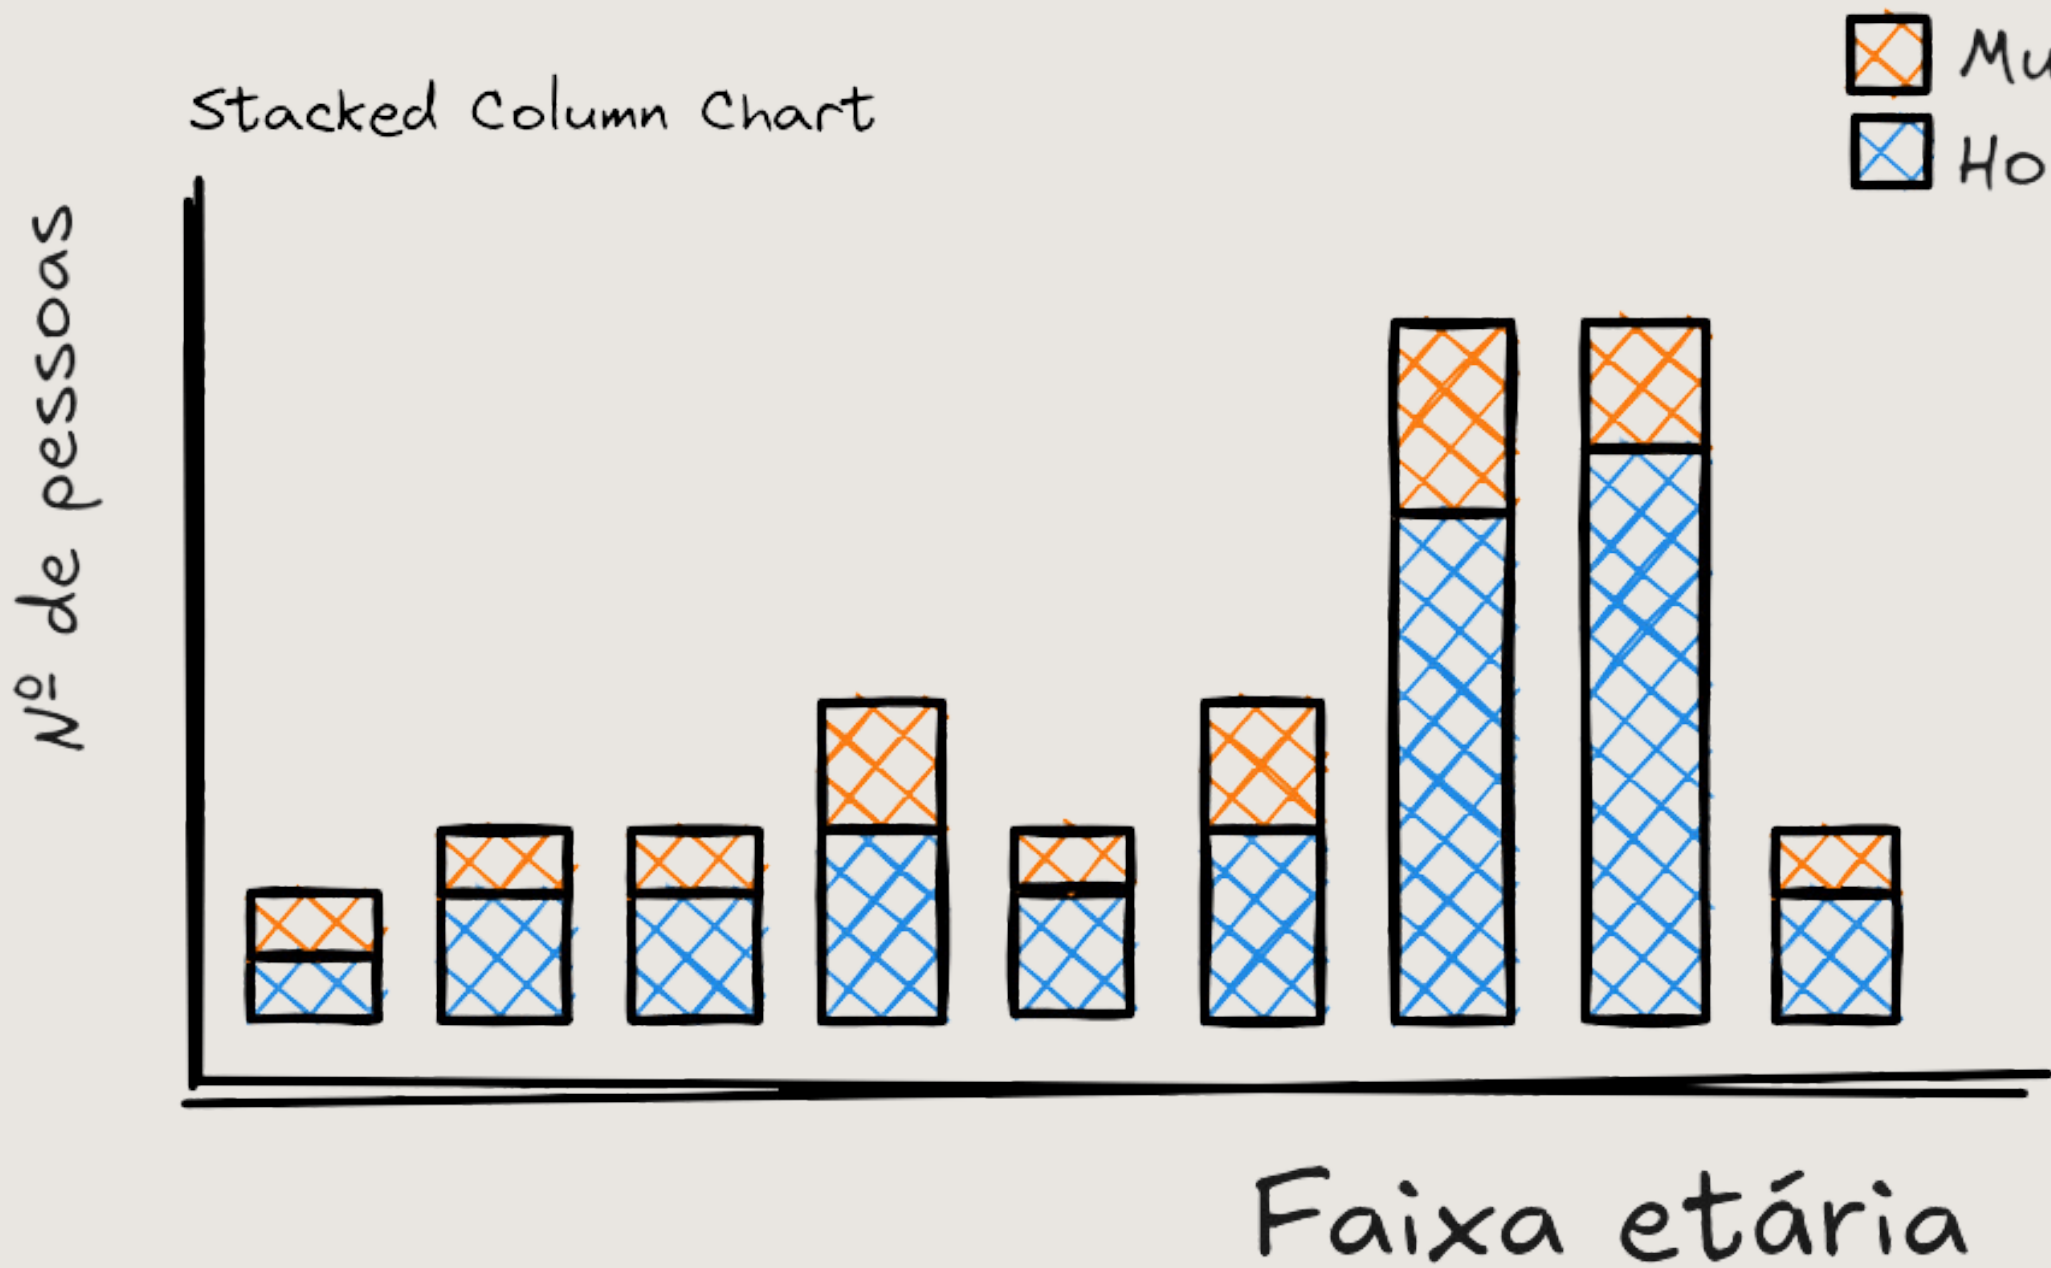

PURPOSE

Visualizes the age structure of the population, helping identify the size of each age group.

Population Distribution by Age and Gender

PURPOSE

Provides a gender breakdown within each age group, making it easy to compare male and female population proportions by age.

Education Level by Age and Gender

Cartesian heatmap

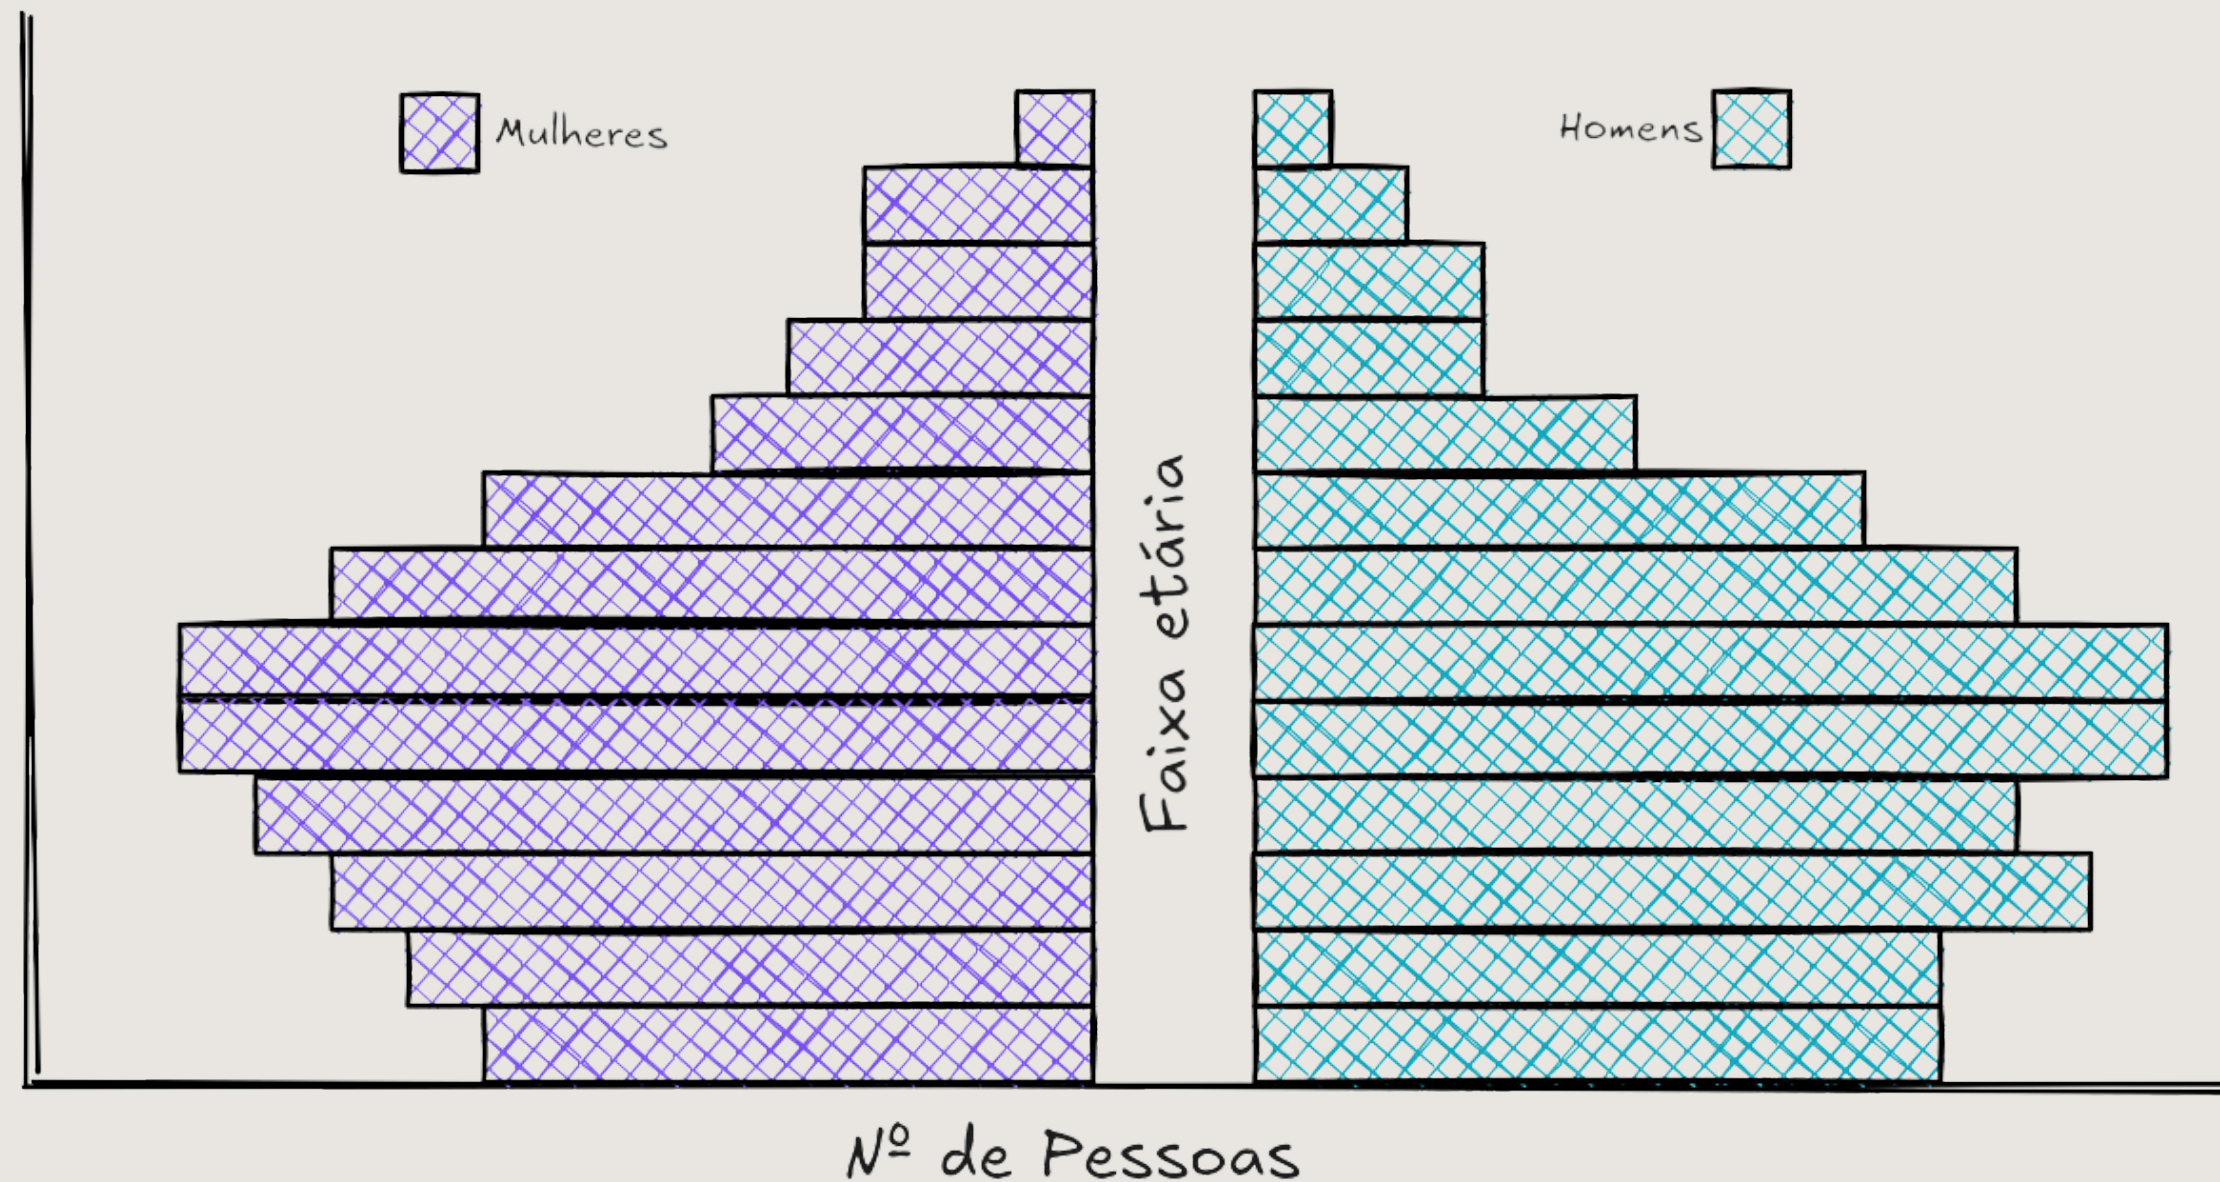

PURPOSE

Visualizes the distribution of education levels by age group, with each cell representing the density of individuals in a specific age group and education level category.

Unemployment Distribution

Population pyramid

PURPOSE

The population pyramid provides a clear, intuitive way to view demographic structure by showing the age distribution within each gender.

LFP User Evaluation

- ▲ Can you select a specific region or municipality on the map? What region did you choose?
- ▲ Is it clear how to switch between data categories (Population, Education, Unemployment)?
- ▲ Are the interactive filters for region and year selection intuitive to use? Did you have any difficulty finding them?
- ▲ After selecting the "Population" category, can you describe what insights to take from the bar chart and donut chart about age distribution and gender balance?
- ▲ Can you explain the difference in information between the population pyramid and the other population graphs?
- ▲ How to use the population pyramid to identify regions with older or younger populations?
- ▲ In the "Education" category, can you interpret the information presented in the Cartesian heat map? What does this tell you about education levels among different age groups?
- ▲ Is it clear what the color intensity represents in the heatmap? Can you explain the trend in education levels based on age?
- ▲ If you wanted to compare education levels between two age groups, how would you do it using this interface?

Heuristic Evaluation

Jakob Nielsen's 10 Usability Heuristics for UI Design, using the severity rating scale proposed by Nielsen:

0	I don't agree that this is a usability problem at all
1	Cosmetic problem only: need not be fixed unless extra time is available on project
2	Minor usability problem: fixing this should be given low priority
3	Major usability problem: important to fix, so should be given high priority
4	Usability catastrophe: imperative to fix this before product can be released

Heuristic Evaluation

1. Visibility of System Status

Issue: There are no loading indicators when filters are applied or charts are updated, leaving users uncertain about progress.

Severity Rating: 2

3. User Control and Freedom

Issue: There is no clear option to "Reset Filters" or restart selections without reloading the page.

Severity Rating: 2

2. Match Between System and the Real World

No issues identified.

4. Consistency and Standards

No issues identified.

Heuristic Evaluation

5. Error Prevention

Issue: There are no clear messages when invalid filter combinations are selected, leaving users unsure how to correct the issue.

Severity Rating: 2

7. Flexibility and Efficiency of Use

Issue: The system does not allow users to export data or save filter combinations, which could benefit advanced users.

Severity Rating: 2

6. Recognition Rather Than Recall

No issues identified.

8. Aesthetic and Minimalist Design

No issues identified.

Heuristic Evaluation

9. Help Users Recognize, Diagnose, and Recover From Errors

Issue: The system lacks clear informational messages for invalid filters or when no data is available for the selected combination.

Severity Rating: 3

10. Help and Documentation

Issue: There is no "About" page or introductory explanation of how to use the system.

Severity Rating: 3

System Usability Scale (SUS)

- ▲ We asked colleagues to explore our application and fill in the questionnaire.
- ▲ We had 4 participants answering the questionnaire.
- ▲ The average SUS score value was 80

Projeto Final de Visualização de Informação - Teste de Usabilidade

Os participantes vão realizar tarefas definidas para testar o nosso website para explorar e visualizar dados.

Functional Prototype

Future Work

Comparison of Data Across Different Years

Enable a feature that allows users to compare data across multiple years, visualizing trends side-by-side or through overlaid charts.

Enhanced Interactivity with Data Export

Introduce data export functionality so users can download charts and datasets in formats like CSV, PDF, or images.

Improved Error Handling and Data Validation

implements mechanisms for handle invalid or missing information.

The slide features decorative geometric patterns in the corners. The top-right and bottom-left corners contain clusters of overlapping triangles and polygons in shades of orange, red, teal, and dark blue. The bottom-right corner has a few smaller, scattered triangles in orange and teal. The main text is centered on a light gray background.

THANKS!

Any questions?
